

Teacher Guide

Introduction

Welcome to the Havant Federation of Schools Virtual Careers Fair 2021!

This event consists of 15 subject videos designed to help your students gain an insight into:

- the wide range of careers these subjects link to.
- the courses and apprenticeships that provide a pathway into these careers.
- the skills each subject develops.

They also include a clip from an employer or university student, discussing how they use specific subjects in their job roles.

At the end of the video, we'll introduce extension activities linked to the subject that will further develop students' understanding.

Links to all these videos and activities are on pages 2-3 of this document.

Using the videos in class

Each video is around ten minutes long and covers a specific school subject. All you need to do is click on the most relevant subject for your class and click play.

Each subject video has a specific extension activity that you can use with your students, if you have time. The extension activities are designed to be flexible to the amount of time you have available. They can be used individually, in small groups or completed as a class.

Using the videos and activities as home learning

These videos and activities have also been designed so that they can be completed independently by students working from home, if circumstances relating to COVID-19 require it.

Further support

If you or your students have any questions about the videos, extension activities or anything else related to careers, do send them on to your school's careers adviser.

The videos for all subjects can be found at:
